Internship with Gababee (July 2024)*

Takeaways from Internships

I was always been credited for having a good eye, and been told to make good use of it. With time and mistakes I have learnt to be organized, especially with ceramics and photography. Ceramics is a medium which humbles you as a person, and meticulous maintainance of a clay studio eventually makes you organized.

Photography on the other hand due to the tasks related categorization and tedious editing improves your eye for colour and organize your folders.
