SURUTHI ANDICHAMY B. Arch., M. Des.
Architect | Product Designer

I am an Architect with over 3+ years of experience, who designs spaces as experiences—where every form, material, and detail serves a purpose. I believe buildings should inspire, connect, and respond to their surroundings.
Extending this approach to holding a degree in Master In Design as a Product Designer, I create sustainable solutions from organic waste, crafting functional objects that enhance daily life with meaning and aesthetically pleasing.
