# Aman Sharma

Industrial and product designer

With a passion for design that harmonizes creativity and functionality, I bring ideas to life by balancing artistic vision with hands-on prototyping and research. My approach starts with a spark-an idea that excites me-and unfolds through sketching, refining, and exploring ways to make each product intuitive, useful, and impactful in everyday life. I aim to create designs that truly connect, offering that ideal blend of form and function to make life just a little easier.
