Collaborated for 6 months as interior designer proposal interior design of residential project collaborated with the development team implement a responsive design approach improving the mobile user experience and increasing mobile of the space we are living and Interior design of the restaurant

Master student TDV
we work to build latest structure 2024

we build the dome with wasting of material like bamboo waste and pipe waste in college renovation

Master student TDV
we work in strategy system design oriented for the NGO with my groups class team 2025

How can we employ design principles to work towards inclusive development with Goonj? How can we augment and further the impact of pre-existing work and initiatives by Goonj? How can we as, a group of designers, contribute towards Goonj's approach to change and improvement?

Master student TDV
project proposal
Interior design concluding course 2025

It was focusing on designing spaces that are both functional and aesthetics for this residential project

Master student TDV
project of SDP self drive project

likely refers to the sustainable construction material , which is made by up cycling textile waste into decorative and construction Materials
