Skills

Creative and Analytical Skills

Creating brand identities, conducting user research, designing user experiences, developing wireframes and prototypes, producing UI graphics, visualizing information, illustrating artwork, and crafting strategic design concepts.

Soft Skills

Open to constructive criticism, skilled in organizing tasks, leading and motivating teams, attentive listening, owning responsibilities, assisting colleagues, adaptable to tight schedules, effective communicator, collaborative problem solver, maintaining composure, and nurturing a positive environment.

About Me

I'm on a continuous path of learning and evolving, tackling challenges with fresh creativity and a collaborative spirit. As a graphic and communication designer, I focus on crafting meaningful visual stories and experiences grounded in deep research. My work centers on cultural narratives, weaving heritage and storytelling into designs that simplify complex ideas and make the intangible clear, engaging, and relevant.

Work Experience

• That Design Studio

Jan'25 - May'25

Served as a Graphic Designer intern, where I played a key role in developing and executing branding strategies for multiple new projects while also enhancing and maintaining existing brand assets. Demonstrated strong project ownership by independently managing a full project lifecycle from initial concept and design development to final delivery and successful live launch.

Academic Projects

• Mynzo Carbon

Feb'24 - May'24

Developed a user-centric design prototype for Mynzo Carbon aimed at helping individuals and communities track and reduce carbon emissions.

• Khamir

Oct' 24 - Dec'24

Designed strategies to expand their learning modules to more varied and expansive audiences

• Fosters + Partners

Oct' 23 - Dec'23

Researched and developed design interventions to mitigate the urban heat island effect in Delhi, focusing on responsive, sustainable solutions that adapt to environmental conditions
